

AIR BAG

RULES

1. Standard Park Rules apply
3. Do not jump until the airbag is clear
4. Do not jump or dive head first into an airbag – this can cause injuries to back and neck
5. Land either on your feet, back or bottom
6. If landing on your feet always jump so you land on both feet at the same time. Never land with just one foot as this can cause an unstable landing
7. Do not 'tuck your knees up' or 'curl up' as this could cause your knees to hit your face when landing
8. Exit the air bag as quickly as possible by the nearest exit point
